<p>No modern Dance Class this week. Next week as usual.</p>

Stoboscope Flash Unit Demonstrated at Camera Club Meeting

At the meeting of February 28, of the **Camera Club**, William Herrmenn demonstrated the general qualities of a Stoboscope Flash unit to replace the conventional flash bulbs. The long term advantages of this unit exceed the initial disadvantage of high cost, particularly in quality of picture, lack of misfires, and freedom from handling of large numbers of bulbs. The feeling expressed was that the unit more than pays for itself in the long run.

The half-hour presentation was another in the interesting series that the Camera Club has been having at its regular meetings in the Recreation Hall on Wednesday evening. If you have been missing these exceptional information sessions, attend the next meeting on Wednesday, March 14 at 7:00 P.M. A talk will be given by Dr. Seymour Katcoff entitled "Testing of Camera Lenses and Shutters."

Several people have requested that such a talk be given. It promises to be one of practical value. Visitors are welcome to attend-Recreation Bldg. - York Lane.

CLASSIFIED
